

# JOURNAL OF LEUKOCYTE BIOLOGY®

An Official Publication of the Society for Leukocyte Biology

Volume 79, Number 4

CONTENTS

April 2006

---

## Reviews

---

- 639 **Chemokines, chemokine receptors, and cancer metastasis.** T. Kakinuma and S. T. Hwang
- 652 **Effector-phase tolerance: another mechanism of how cancer escapes antitumor immune response.** A. B. Frey and N. Monu

---

## Pathogenesis and Host Defense

---

### RAPID COMMUNICATION

- 663 **Sex-specific phenotypical and functional differences in peripheral human V $\gamma$ 9/V $\delta$ 2 T cells.** N. Caccamo, F. Dieli, D. Wesch, H. Jomaa, and M. Eberl
- 667 **The effect of PGG- $\beta$ -glucan on neutrophil chemotaxis in vivo.** B. W. LeBlanc, J. E. Albina, and J. S. Reichner
- 676 **Characterizing the circulating, gliadin-specific CD4<sup>+</sup> memory T cells in patients with celiac disease: linkage between memory function, gut homing and Th1 polarization.** S. Ben-Horin, P. H. R. Green, Ilan Bank, L. Chess, and I. Goldstein
- 686 **High-level expression of B7-H1 molecules by dendritic cells suppresses the function of activated T cells and desensitizes allergen-primed animals.** H. K. Kim, H. Guan, G. Zu, H. Li, L. Wu, X. Feng, C. Elmets, Y. Fu, and H. Xu
- 696 **L-selectin and intercellular adhesion molecule-1 regulate the development of Concanavalin A-induced liver injury.** A. Kawasuji, M. Hasegawa, M. Horikawa, T. Fujita, Y. Matsushita, T. Matsushita, M. Fujimoto, D. A. Steeber, T. F. Tedder, K. Takehara, and S. Sato

---

## Cell Development, Growth, Differentiation, and Function

---

- 706 **Hypoxia reduces the output of matrix metalloproteinase-9 (MMP-9) in monocytes by inhibiting its secretion and elevating membranal association.** M. A. Rahat, B. Marom, H. Bitterman, L. Weiss-Cerem, A. Kinarty, and N. Lahat
- 719 **CD13 in cell adhesion: aminopeptidase N (CD13) mediates homotypic aggregation of monocytic cells.** P. Mina-Osorio, L. H. Shapiro, and E. Ortega
- 731 **DC-SIGN (CD209) recognition of *Neisseria gonorrhoeae* is circumvented by lipooligosaccharide variation.** P. Zhang, O. Schwartz, M. Pantelic, G. Li, Q. Knazze, C. Nobile, M. Radovich, J. He, S.-C. Hong, J. Klena, and T. Chen
- 739 **H2 complex controls CD4/CD8 ratio, recurrent responsiveness to repeated stimulations, and resistance to activation-induced apoptosis during T cell response to mycobacterial antigens.** A. V. Pichugin, S. N. Petrovskaya, and A. S. Apt
- 747 **Imatinib mesylate minimally affects bcr-abl<sup>+</sup> and normal monocyte-derived dendritic cells but strongly inhibits T cell expansion despite reciprocal dendritic cell-T cell activation.** N. Boissel, P. Rousselot, E. Raffoux, J.-M. Cayuela, J. Soulier, N. Mooney, D. Charron, H. Dombret, A. Toubert, and D. Rea
- 757 **Detection and properties of the human proliferative monocyte subpopulation.** F. I. L. Clanchy, A. C. Holloway, R. Lari, P. U. Cameron, and J. A. Hamilton

---

## Extracellular Mediators and Effector Molecules

---

- 767 **CCL5-enhanced human immature dendritic cell migration through the basement membrane in vitro depends on matrix metalloproteinase-9.** V. Chabot, P. Reverdiau, S. lochmann, A. Rico, D. Sénécal, C. Goupille, P.-Y. Sizaret, and L. Sensebé
- 779 **Chemokine- and adhesion-dependent survival of neutrophils after transmigration through cytokine-stimulated endothelium.** H. M. McGettrick, J. M. Lord, K.-Q. Wang, G. E. Rainger, C. D. Buckley, and G. B. Nash
- 789 **CCL2 as a trigger of manifestations of compensatory anti-inflammatory response syndrome in mice**

(continued on next page)

with severe systemic inflammatory response syndrome. H. Takahashi, Y. Tsuda, M. Kobayashi, D. N. Herndon, and F. Suzuki

- 797 **Regulation of PTX3, a key component of humoral innate immunity in human dendritic cells: stimulation by IL-10 and inhibition by IFN- $\gamma$ .** A. Doni, M. Michela, B. Bottazzi, G. Peri, S. Valentino, N. Polentarutti, C. Garlanda, and A. Mantovani
- 803 **Different effects of adiponectin isoforms in human monocytic cells.** M. Neumeier, J. Weigert, A. Schäffler, G. Wehrwein, U. Müller-Ladner, J. Schölmerich, C. Wrede, and C. Buechler
- 809 **The Kupffer cell protects against acute lung injury in a rat peritonitis model: role of IL-10.** H. Kono, H. Fujii, Y. Hirai, M. Tsuchiya, H. Amemiya, M. Asakawa, A. Maki, M. Matsuda, and M. Yamamoto

### **Receptors, Signal Transduction, and Genes**

---

- 818 **Divergent expression and function of glucocorticoid receptor  $\beta$  in human monocytes and T cells.** L.-b. Li, D. Y. M. Leung, C. F. Hall, and E. Goleva
- 828 **Differential expression of leukocyte-associated Ig-like receptor-1 during neutrophil differentiation and activation.** A. Verbrugge, T. de Ruiter, C. Geest, P. J. Coffey, and L. Meyaard
- 837 **The macrophage scavenger receptor CD163: endocytic properties of cytoplasmic tail variants.** M. J. Nielsen, M. Madsen, H. J. Møller, and S. K. Moestrup
- 846 **A (G $\rightarrow$ C) transversion in the 3' UTR of the human ECP (eosinophil cationic protein) gene correlates to the cellular content of ECP.** U.-B. Jönsson, J. Byström, G. Stålenheim, and P. Venge
- 852 **p53 regulates Btk-dependent B cell proliferation but not differentiation.** N. W. Schmidt, L. D. Mayo, D. B. Donner, and M. H. Kaplan
- 860 **Impaired dendritic cell function in Crohn's disease patients with NOD2 3020insC mutation.** M. Kramer, M. G. Netea, D. J. de Jong, B. J. Kullberg, and G. J. Adema
- 867 **Bacterial lipoprotein-induced self-tolerance and cross-tolerance to LPS are associated with reduced IRAK-1 expression and MyD88-IRAK complex formation.** C. H. Li, J. H. Wang, and H. P. Redmond
- 876 **The lectin jacalin plus costimulation with anti-CD28 antibody induces phosphorylation of p38 MAPK and IL-4 synthesis-I.** S. M. L. Tamma, S. P. Balan, K. W. Chung, and S. Pahwa

**COVER:** Summary of proposed roles of CCR7, CXCR4, CCR9 and CCR10 in melanoma metastasis to lymph nodes, lungs, small bowel, and skin. In their article in this issue, Kakinuma and Hwang discuss chemokine receptors' potential to facilitate tumor dissemination at several key steps of metastasis. For more information, see pages 639–651.
